General Description

The AAT1500 is a step-up converter that provides a solution to drive 1 to 4 white LEDs with a constant current from a Lithium Ion cell, and its switching frequency is fixed at 1 MHz.

The AAT1500 offers a low 0.25V reference, which minimizes power loss in the current setting resistor and improves efficiency. Protection feature includes output over voltage protection. The AAT1500 consists of a 0.1 μ A shutdown current, and HV internal switch. Input supply range allows operation from 2.6V to 6V.

Pin Configuration

The AAT1500 is available in 6-pin SOT-26 and 8-pin VQFN-8 package.

Applications

- Palmtops
- MP3 Player
- Digital Still Cameras
- Portable Media Player
- Cell Phones and Smart Phones
- Electronic Information Organizers
